ABSTRACT

Data are presented on fall 1978 enrollment in American colleges and universities. The data were obtained from 3,173 two-year and four-year public and private colleges and universities and their branches included in the National Center for Education Statistics' "Education Directory, 1978-79, Colleges and Universities." Information is grouped under seven major categories: summary tables, enrollment by level of institution, enrollment by state, enrollment by institution, enrollment by race/ethnicity, enrollment by major degree field, and enrollment by major degree field and race/ethnicity. Findings include the following: enrollments in colleges and universities declined for the second time in the last three years: public college and university enrollments dropped for all three types of institutions, while total private school enrollment increased; women enrollments in colleges for the past several years have counterbalanced the decreases in enrollments experienced by men; and a total of 1.8 percent fewer students attended college full-time in 1978 than the previous year. Background information on the survey population and questionnaire procedures and a sample survey questionnaire are included. (SW)

National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

In order to minimize the burden on reporting institutions, the National Center for Education Statistics (NCES) and the Office for Civil Rights (OCR) Department of Health, Education, and Welfare agreed in 1976 to conduct a single fall enrollment survey that would satisfy the data requirements of both agencies. The agreement provides for the collection of race/ethnic and field of study data on alternate years of the annual fall enrollment survey. Consequently, OCR's biennial Fall Enrollment and Compliance Report (FECR) and NCES's annual Fall Enrollment (OFE) survey were combined into one questionnaire. NCES serves as the data collection agency for the information which forms the basis of the reports. This year's report includes race/ethnic and field of study enrollment data as well as other enrollment data collected in 1978.

Acknowledgments

The continuing cooperation of the registrars and other college and university officials who supplied the data for this report is deeply appreciated.

Special recognition is due the following National Center for Education Statistics employees for their efforts: Rosa Simmons prepared the tables and figures. Lillian Beander provided secretarial assistance and service. Thomas Hill edited the report.

Overview

Enrollments in the Nation's colleges and universities declined for the second time in the last three years. The headcount of full-time and part-time students for school year 1978-79 is 11,391,950 (table I). The 0.2 percent enrollment decrease coupled with the 1.5 percent decline in 1976 indicates that enrollments have peaked in institutions of higher education. It is also reasonable to assume that enrollments will level off for the next several years because of the declining high school enrollment statistics. This trend comes after more than two decades of continuous enrollment growth in the U.S. colleges and universities.

Public college and university enrollments dropped for all three types of institutions (universities – 0.4 percent, other 4-year – 0.9 percent, and 2-year – 0.8 percent). In contrast, total private school enrollments increased 1.6 percent from 1977-78 (table I). While private universities experienced a small decrease of 0.7 percent in 1978, the overall increase for private schools was largely the result of a 9.6 percent increase in private 2-year community and junior college enrollments and a 1.9 percent increase in private other 4-year schools. Another factor was the existence of 41 new privately controlled institutions in 1978 over the 1977 universe of schools.

Women enrollments in colleges for the past several years have counterbalanced the decreases in enrollments experienced by men. The fall 1978 enrollment figures show a 2.2 percent increase in women enrollment providing a total headcount for women of 5,694,116 (table I). This represents 49.9 percent of all enrollments and a difference of only 3,718 fewer women than men attending institutions of higher education in fall 1978.

A total of 1.8 percent fewer students attended college full-time in 1978 than the previous year. The largest impact of declining full-time enrollments occurred in public 2-year schools which declined 6.9 percent (table II). In contrast, part-time attendance increased 2.3 percent over 1977 (table II).

The percentage drop (0.4 percent) in new first-time freshmen enrolled in college in 1978 was greater than the percent decline (0.2 percent) for all students enrolled in school. Only a 1.0 percent increase in new freshmen enrolled in private institutions prevented a greater overall decrease. Table IV shows that the number of first-time freshmen men declined (1.4 percent) while women attending school for the first-time increased slightly (0.6 percent).

Survey Universe

The universe for the 1978 Opening Fall Enrollment survey was the 3,173 2-and 4-year public and private colleges and universities and their branches. They are included in the *Education Directory, 1978-79 College and Universities* (NCES 79-310) with such changes as were known to NCES in fall 1978.

Control and Level of Institution

All public institutions of higher education surveyed in fall 1978 experienced decreases in enrollments with the greatest decline occurring in public 4-year schools (table I). Public institutions reported a 0.7 percent decrease in total enrollment. In contrast, total enrollments in private institutions increased for the second consecutive year (1.6 percent). This increase was not as large as the increase experienced in fall 1977 (4.1 percent). Figure A shows that the only enrollment decrease in private institutions occurred in universities (0.7 percent) while other 4-year and 2-year colleges registered gains of 1.9 and 9.6 percent, respectively.

Enrollment patterns have varied considerably among the different types of institutions, but the percent distribution has been more consistent for each type. For example, university enrollments dropped consistently

between 1973 and 1976, but leveled off in fall 1977 (figure B). Other 4-year institutions showed modest enrollment declines from 1973 to 1975 and then remained relatively constant to 1978. A similar pattern holds true for 2-year institutions from 1975 to the present, except for sharp enrollment increases which occurred prior to 1975 (figure C).

Sex

In 1978 women comprised 49.9 percent of all enrollments in colleges and universities (figure C). This represents an increase of 2.3 percent over the previous year's total. Only 3,718 more men than women were enrolled in college in fall 1978. By the school year 1979-80, the ratio is expected to favor women for the first time since enrollment records were maintained by the Federal government.

Figures C and D illustrate the fact that increased enrollments of women kept overall enrollment levels from declining. Women enrollments in private institutions increased (4.0 percent) (figure D); public institutions also increased their enrollment of women, but not at the same rate as private schools (1.8 percent). While the largest percent increase in women enrollments (14.0 percent) occurred in private 2-year colleges, this increase has less impact than the 4.1 percent increase recorded in other 4-year institutions because the number of students enrolled in other 4-year schools is four times the number in private 2-year schools.

The number of men enrolled in college continued to decline regardless of the type or control of the institution attended. The most notable enrollment decline for men occurred in 2-year public institutions (4.3 percent). In contrast, women showed the greatest increase (2.6 percent) in the same institutions (table I). The only increase in enrollment of men occurred in private 2-year colleges (3.9 percent) where the total enrollment is less than 200,000 students (table I).

Attendance Status

The increasing rate of part-time enrollment is evident from table II which shows an increase in part-time attendance for fall 1978 of 2.3 percent. This increase, while not as large as the increase in part-time attendance recorded in fall 1977 (4.6 percent), is significant because of the 1.8 percent decrease in the number of full-time students.

The overall decrease in full-time enrollment affected public institutions more than private schools. Two-year public colleges were particularly affected with an enrollment decline of 6.9 percent. Four-year public college enrollments dropped 0.6 percent for universities and 1.8 percent for other 4-year institutions.

Gains in full-time enrollments were more noticeable among private institutions for school year 1978-79. Increases occurred in all types of private institutions with the largest increase reported in 2-year colleges. While this increase is less dramatic because of the total enrollment in private 2-year colleges (less than 200,000), the increase is important at a time when enrollments are declining overall. The number of students enrolled part time in private colleges also increased but not at all category levels. Private universities experienced a 4.3 percent decrease in part-time student enrollments (table II). Part-time attendance at private 2-year institutions showed the most dramatic increase over 1977 figures (15.9 percent). The percent change in enrollment by attendance status from 1977 to 1978 is shown in figure E. Private institutions show more consistency in attendance status for each type of institution while public institutions show more fluctuation's from one type of institution to the other.

Enrollment Category

A small decrease in total enrollment in fall 1978 occurred in undergraduate and graduate level enrollments. Table III shows that undergraduate enrollment declined 0.7 percent while graduate enrollment declined 0.6 percent. Enrollments of unclassified students continued to increase, but at a smaller rate of increase than experienced in 1977 (3.1 percent versus 4.8 percent).

More important is the 3.0 percent increase in first-professional enrollment, which represents the nation's medical, dental, veterinary, and law school populations. While first-professional enrollments have been relatively stable from year to year, the trend for the last several years showed significant increases from year to year (table III).

Enrollments of men decreased at each level of enrollment except for the first-professional level. Under-

graduates had the largest decrease at 2.8 percent followed by a 2.5 percent decrease at the graduate level. The number of unclassified men also decreased by 1.9 percent. The increase recorded at the first-professional level was 1.3 percent.

The gains for women at the various enrollment levels are consistent with their overall enrollment gains. In 1978, the largest increase for women occurred at the first-professional level (8.3 percent). The number of women undergraduates in 1978 increased, but at a smaller rate of increase than in 1977 (1.4 percent versus 6.1 percent). For the second straight year, women enrolled at the graduate level increased while enrollments for men at the same level continued to decline. When attendance status is viewed over a period of time one sees that full-time undergraduates declined progressively from 1975 to 1978 while part-time undergraduates increased. At the graduate level, the progression is reversed for each attendance status category (figure F). Figure G shows attendance status from 1972 to 1978 by sex of student while figure H reports the percent change in enrollment by level from 1975 through fall 1978.

Figure I shows the distribution of students by level of enrollment. While undergraduate enrollments occupy the most area of the bar chart for the four years shown, unclassified enrollments exceed graduate enrollments from 1976 to 1978.

In figure J the level of enrollment is presented by sex of student enrolled. The pie charts show that undergraduate enrollments are evenly distributed by sex followed by graduate enrollments. Figure K shows, from 1973 to 1978, that enrollments of women were only a fraction of first-professional school enrollments.

First-time Freshmen

The number of first-time freshmen entering college in 1978 declined 0.4 percent. This decline comes after a 1977 first-time freshmen enrollment increase of 2.3 percent (table IV).

While the proportion of men to women enrolled in all institutions of higher education is nearly equal, first-time freshmen women continue to increase their numbers over freshmen men attending school for the first-time. Although less than 1 percent more first-time freshmen women enrolled in college in 1978 than in 1977, 52 percent of all first-time freshmen were women. The number of first-time freshmen entering public institutions decreased in 1978 for both other

4-year colleges (0.6 percent) and 2-year schools (1.1 percent). Public universities managed to attract only 0.6 percent more first-time freshmen. In contrast, all three types of private colleges had small increases in first-time freshmen enrollments (see table IV).

Enrollment patterns for attendance in 1978 showed an increase in part-time first-time freshmen of 3.5 percent with a disturbing 2.0 percent decrease of first-time freshmen attending school on a full-time basis. The decline in full-time attendance is most likely the result of a drop in the number of 18-year-olds in the population. This age group serves as the primary resource for first-time full-time freshman. Figure L shows the percent distribution of first-time freshmen from 1973 to 1978 by type of institution freshmen are enrolled in. Virtually no change has occurred in the distribution of first-time freshmen enrollments among the three types of colleges surveyed from 1973 to 1978. In figure M, the percent change in first-time freshmen enrollments is presented from 1976 to 1977 and from 1977 to 1978.

Major Field of Study

Figure N shows the 1978 enrollment data by 10 major fields of study categories. The 10 fields of study were selected by the Office for Civil Rights (OCR) in order to provide information on the potential supply of manpower among minorities in those areas of specialization. The categories are: agriculture and natural resources, architecture and environmental design, biological sciences, business and management, engineering, dentistry, medicine, veterinary medicine, law, and physical sciences. The majority of students for both 1976 and 1978 had fields of study that were not classified into any of the 10 available categories, and thus were grouped under the "All other" category (76 percent and 74.3 percent, respectively) (figure O). Men outnumbered women in every field classified by an institution for both years. In the largest field, business and management, women enrollments increased 1.3 percent while enrollment of men increased only 0.3 percent. In the field of engineering, women showed a gain of 0.2 percent, while the enrollment of men increased 0.4 percent. In the fields of dentistry, medicine, and veterinary medicine, enrollments of both sexes remained virtually unchanged from 1976 to 1978.

Race/Ethnicity

Table V shows the number of minorities enrolled in institutions of higher education in fall 1976 and 1978. Although non-resident aliens are not considered a minority for purposes of this survey, the category is included to ensure that these individuals are not classified into any other minority category. Table V shows

that in terms of total numbers non-resident aliens have the second largest percent increase in enrollment from fall 1976 to fall 1978 (15.1 percent). Only Asian or Pacific Islanders had a greater increase in enrollments (18.5 percent). The smallest enrollment growth for minorities occurred among black non-Hispanics (1.9 percent).

Asian or Pacific Islanders had the largest percentage increase of undergraduates from 1976 to 1978 (16.9 percent) while American Indians/Alaskan Natives and black non-Hispanics had virtually no changes in enrollments at the undergraduate level. At the graduate level, black non-Hispanic enrollments decreased 5.3 percent while enrollments of American Indians/Alaskan Natives decreased 3.4 percent. Asian or Pacific Islanders increased their enrollments by more than 10.0 percent, while foreign student enrollments increased 11.0 percent over 1976.

The total number of minorities enrolled at the first-professional level is minimal, consequently, any percent change would be significant. Enrollments of American Indians/Alaskan Natives decreased 18.8 percent or a total of 249 students.

A total of 243 black non-Hispanic students or a 2.2 percent increase were enrolled in first-professional degree programs in 1978 than in 1976. Although Asian or Pacific Islanders had the largest percent increase (17.8 percent), black non-Hispanics enrolled in greater numbers at the first-professional level from 1976 to 1978. In figure P the number and percent distribution of enrollments by race/ethnicity is graphically shown for fall 1976 and fall 1978.

Presentation of Data

The tables displaying the data are grouped under seven major categories:

I. Summary tables
II. Enrollment by level of institution
III. Enrollment by State
IV. Enrollment by institution
V. Enrollment by race/ethnicity
VI. Enrollment by major degree field
VII. Enrollment by major degree field and race/ethnicity

Because of space limitations, some of the tables generated by the survey are not included in this report. For these tables, footnotes indicate to the reader what data are available along with appropriate instructions for obtaining copies of the complete tables.

With the exception of the institutional listing with summary data, the tables in this report are aggregated by State and by control and level of institution. Background information on the survey population is presented in appendix A, together with questionnaire procedures. A reproduction of the survey questionnaire appears in appendix B.

Basic Tables

I. Summary Tables

NOTE– Current enrollment data for 3 of the 3,173 institutional units in the higher education statistical universe represented in this report are not included in the tabulation for the following reasons: The San Francisco Community Colleges Center System enrollment is totally non-credit adult education and is therefore not applicable to this report. The Center for Degree Studies in Pennsylvania has enrollment comprised solely of correspondence students. The Community College of the Air Force does not offer classes. Students taking courses through this program are included in enrollment counts for the institutions in which they are actually taking classes.

1/ Includes students whose programs of work consist wholly or chiefly of work normally creditable toward a bachelor's or higher degree or some other formal recognition below the baccalaureate.

2/ A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "Total, All Students" counts.

1/ 1 = Public; 2 = Private.

2/ 1 = University; 2 = other 4-year; 3 = 2-year; 4 = other 4-year branch campus of a multi-campus university; 5 = 2-year branch campus of a multi-campus university; 6 = 2-year branch campus of other 4-year multi-campus institution; 7 = multi-campuses.

3/ The totals for undergraduate, first-professional, graduate, and unclassified do not add to the grand total for all students. There is a difference of 3 students because a number of institutions were unable to divide their enrollments by the categories listed.

4/ Does not include 5,645 students who are now included under Radcliffe.

In addition to the data in Table 16 covering total enrollment in all institutions of higher education by state or other area and institution, other tables are available upon request. These tables, 17 through 22, present total enrollment by level of enrollment for each institutions surveyed for undergraduates (Table 17), post-baccalaureate students (Table 18), full-time equivalent (FTE) of part-time enrollment of undergraduates (Table 19), full-time equivalent (FTE) of part-time enrollment of post-baccalaureate students (Table 20), full-time equivalent (FTE) of part-time enrollment and number of first-time students (Table 21), and first-year undergraduates (Table 22). Copies of these tables may be obtained at a nominal cost by writing: Data Systems Branch, National Center for Education Statistics, Room 3033, 400 Maryland Avenue, SW., Washington, D.C., 20202 or telephone at (202) 245-8670.

1/The count of 11,363,031 represents the total head count for all races of students enrolled in the 3,173 institutions of higher education surveyed in fall 1978. A difference of 28,919 students exists between total head count for all students and total head count for all races due to the fact that a number of institutions were unable to identify the race of the students enrolled in that institution.

In addition to the Data in Table 29 covering total enrollment in institutions of higher education by major degree field and ethnicity, other tables are available upon request. These tables, 30 through 35, present total enroll-

Survey Background

The *Education Directory, 1978-79, Colleges and Universities*[1] was the source for the list of institutions included in the survey on which this report is based.

Institutions of higher education (or the individual branches of multi-campus institutions) included in this report are classified as either 2-year or 4-year institutions, with universities as a separate subclassification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some recognition equivalent to such degrees; e.g., ecclesiastical recognition in theological institutions. Some 4-year institutions also offer organized occupational programs of less than 4 years that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that place considerable emphasis on graduate instruction and have at least two professional schools that are not exclusively technological.

The numbers of institutional units in the fall 1978 survey, and for comparison in the fall 1977 survey, are shown in the table below. For the convenience of the reader, the questionnaire, instruction, and definitions used in the survey are reproduced in appendix B of this report. Complete data were received for all but two of the 3,173 units in the survey.

QUESTIONNAIRE EDITING

Each report form filed in this survey was compared with the report form filed by each institutional unit in the comparable 1977 survey. Large differences in enrollment patterns were accepted if reasons for them were readily apparent. If further information was needed, respondents were contacted by letter and/or telephone for verification, revision, or additions to the figures reported. These procedures undoubtedly eliminated the larger reporting errors, but the extent to which small, unrecognized errors may remain is unknown.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded but are given as they were obtained – by simple addition of the figures for individual institutional units. This does not imply that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add exactly to the totals. Also, in view of the care with which the data were compiled by respondents and reviewed by the National Center for Education Statistics, it seemed appropriate that the totals reflect the individual reports.

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis (i.e., has a relatively permanent administration), which offers an organized program or programs of work of at least 2 years (as opposed to courses), and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

VOLUNTARY VERSUS REQUIRED REPORTING

This survey constitutes an integral part of the comprehensive system of statistics on higher education collected by the National Center for Education Statistics *(NCES)* as part of the Higher Education General Information Survey *(HEGIS)*.

In recent years, for the purpose of enforcing compliance with Federal regulations implementing civil rights laws applicable to institutions of higher education, the Office for Civil Rights *(OCR)* has been collecting similar enrollment data on a mandatory basis.

In order to lighten the burden on reporting institutions by eliminating the considerable duplication of effort in reporting enrollment data to two seperate agencies, the two surveys have been combined into this single questionnaire and integrated into the HEGIS program.

Completion of this questionnaire is mandatory for all institutions of higher education which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Health, Education and Welfare *(HEW)* regulation implementing Title VI *(45 CFR 80.13)*, or as defined in any HEW regulation implementing Title IX. *(See also the Instructions for completing this questionnaire.)*

Those institutions to which the regulations do not apply are not required to complete this questionnaire. However, it is hoped that institutions not subject to these provisions will voluntarily complete the entire survey--or at least the Summary page--in order that the data may represent the entire universe of higher education. As a minimum NCES requests that institutions complete columns 13 through 15 on the Summary page in order to enable NCES to continue to provide basic enrollment data serving the needs and interests of the higher education community.

INSTRUCTIONS AND DEFINITIONS

NOTE. The card that forms the back cover of this report is for the convenience of respondents in providing preliminary data for a pre-publication release. The bottom half of the card is a self-mailer that can be detached without loosening the pages of the report.

GENERAL INSTRUCTIONS

Proofread the completed report before returning it to the National Center for Education Statistics.

This report should include only college-level students taking work creditable toward a bachelor's or higher degree or some other formal recognition below the baccalaureate.

If exact counts are lacking for a particular category of students that should be reported, include an estimate for that group.

Do NOT fill out separate forms for extension centers. Only campuses with their own FICE code numbers should be reported on separate questionnaires. Extension students should be reported on the form for the main campus.

Do NOT include in this report:

(a) Students in noncredit adult education courses.

(b) Students taking courses at home by mail, radio, or television.

(c) Students enrolled only for "short courses."

(d) Auditors.

(e) Students studying abroad if their enrollment at the reporting institution is only an administrative record and the fee is only nominal.

(f) Students in any branch campus or extension center in a foreign country.

(g) High school students taking college courses.

(h) Students known to be enrolled concurrently at another college or university, if the latter will report their enrollment *(to avoid double-counting)*. Normally, the institution that will eventually grant the degree should report the student's enrollment.

NOTE. No matter what the calendar system, report on this questionnaire only those students enrolled and only those credit-hours being earned during the FALL TERM.

If you need CLARIFICATION of any item on the questionnaire that pertains to fall enrollment, please call the Survey Director, Dr. Andrew J. Pepin, NCES, (202) 245-8392, in Washington, D.C. 20202. Any questions concerning the racial/ethnic categories or major fields of study should be directed to Ms. Carol Campbell, Office for Civil Rights, (202) 245-7420, in Washington, D.C. 20201.

MAJOR FIELDS OF STUDY AND CORRESPONDING MAJOR FIELD CODES.

The listing below identifies selected categories of major fields of study, and their corresponding codes. These were taken directly from the HEGIS Taxonomy of Instructional Programs in Higher Education and aggregated into the fields listed. The field name and corresponding code number have been preprinted in the upper left-hand corner of each page. If your institution has no students enrolled in any of the designated fields, check the box as indicated. Students enrolled in the fields of Dentistry, Medicine, Veterinary Medicine and Law are not to be reported as undergraduate or graduate students but only as First-Professional students. Students in these programs requiring only 4 or 5 years beyond high school should be reported as undergraduates in the appropriate fields.

0100 – Agriculture and Natural Resources
0200 – Architecture and Environmental Design
0400 – Biological Sciences
0500 – Business and Management
0900 – Engineering
1204 – Dentistry
1206 – Medicine
1218 – Veterinary Medicine
1400 – Law
1900 – Physical Sciences
9000 – All other *(fields not included above and undecided/undeclared)*
9999 – Summary *(total enrollment)*. In addition to separate reports for each of the major fields or sub-fields listed above, complete the Summary report which aggregates the enrollment data on the individual field reports.

Column 15 will be completed ONLY for the Summary report. Individual reports will NOT show data in column 15.

FILING INSTRUCTIONS – COMPLIANCE REQUIREMENTS.

Title VI of the Civil Rights Act of 1964 requires that recipients of Federal financial assistance offer their benefits and services without regard to race, color, or national origin. Title IX of the Education Amendments of 1972 requires that the benefits and services of federally assisted educational programs and activities be offered, with certain exceptions, nondiscriminatorily on the basis of sex. This report is one indicator utilized by the Office for Civil Rights in carrying out its responsibilities to verify compliance with Title VI and Title IX. Also applicable are Section 799-A, Part H, Title VII and Section 845, Part C, Title VIII of the Public Health Service Act of 1972.

This report is to be filed by all institutions of higher education which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Health, Education, and Welfare Regulation implementing Title VI *(45 CFR 80.13)*, or as defined in any Department of Health, Education, and Welfare Regulation implementing Title IX. If your institution does not fall into any of these categories, please inform us of this fact.

Section 80.6(b) of the Regulation implementing Title VI, set forth below, and similar provisions of the Title VI Regulations of other Federal agencies, authorize collection of this information:
80.6 Compliance information
(b) Compliance reports***

> Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. For example, recipients should have available for the Department racial and ethnic data showing the extent to which members of minority groups are beneficiaries of and participants in federally-assisted programs. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

Each institution of higher education, as well as each separately certified branch campus *(with its own FICE code number)* that is subject to the HEW civil rights regulations cited above is required to complete a separate compliance report for certain selected major fields *(listed below)* as indicated in the upper left-hand corner of each page.

RACIAL/ETHNIC CATEGORIES.

The following five racial/ethnic categories are utilized in the survey:

Black Non-Hispanic
American Indian or Alaskan Native
Asian or Pacific Islander
Hispanic
White Non-Hispanic

In addition, non-resident aliens, i.e., those members of the aforementioned groups who have not been admitted to the United States for permanent residence, should be separately identified as a sixth category; the non-resident aliens are not separately requested by racial/ethnic group, but only in totals.

The definitions for these categories are:

Non-resident alien. A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely. Resident aliens, non-citizens who have been lawfully admitted for permanent residence *(and who hold a "green card," Form I-151)*, are to be reported in the appropriate racial/ethnic categories along with United States citizens. Nonresident aliens are to be reported separately, in the columns provided, rather than in any of the five racial/ethnic categories which follow.

Black Non-Hispanic. A person having origins in any of the black racial groups of Africa.

American Indian or Alaskan Native. A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

White Non-Hispanic. A person having origins in any of the original peoples of Europe, North Africa, or in the Middle East.

Racial/ethnic designations as used in this survey do not denote scientific definitions of anthropological origins. For the purpose of this report, a student may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging. However, no person may be counted in more than one racial/ethnic group.

The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data. One acceptable method is a properly controlled system of post-enrollment self-identification by students. If a self-identification method is utilized, a verification procedure to ascertain the completeness and accuracy of student submissions should also be employed where feasible. In order to provide reasonably accurate data, the institution may require students to complete a questionnaire and/or identify themselves by name or otherwise when providing information. The fact that the information is being gathered to comply with Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972 may be disseminated in the manner and to the extent that the administration deems appropriate.

DEFINITIONS

UNDERGRADUATES. Students enrolled in a 4- or 5-year bachelor's degree program, in an associate degree program, or in a vocational or technical program that is normally terminal and results in formal recognition below the baccalaureate.

CLASS LEVEL. Whether first-year, second-year, etc., should be determined in a logical, consistent, and identifiable way. Usually, a student's class level would be based on the proportion of total requirements he has obtained toward the completion of the degree program in which he is enrolled, according to the number of years normally required to obtain them.

FIRST-TIME FRESHMEN. Entering freshmen who have not previously attended ANY college. Include students enrolled in the fall term who attended college for the first time in the summer of 1978. Also include students who entered with advanced standing *(college credits earned before graduation from high school)* at the freshman level.

OTHER FIRST-YEAR. First-year students who entered the institution before the summer of 1978.

UNCLASSIFIED STUDENTS. Not candidates for a degree or other formal award, although taking courses in regular classes with other students.

UNDERGRADUATE LEVEL. Includes but is not limited to undergraduates who cannot be classified by class standing; for example, new transfer students. Also included are students who already have bachelor's degrees or awards below the baccalaureate but are taking courses at the same level or lower. Included also are "special students" and teachers taking additional undergraduate courses for certification.

POSTBACCALAUREATE LEVEL. Includes but is not limited to "special" and other students taking first-professional or graduate courses but who are not working toward a degree.

FIRST-PROFESSIONAL STUDENTS. Students enrolled in a professional school or program which required at least 2 academic years of college work for entrance and a total of at least 6 years for a degree. Report only students in those first-professional degree programs in the field of medicine, law, and theology specified in Part A of NCES Form 2300-2.1, Degrees and Other Formal Awards Conferred. Students in programs requiring only 4 or 5 years beyond high school should be reported as undergraduates, and not in the first-professional fields.

GRADUATE STUDENTS. Students who hold the bachelor's or first-professional degree, or equivalent, and are working toward a master's or doctor's degree.

FIRST-YEAR. Graduate students who have completed less than one full year of required graduate study.

BEYOND THE FIRST YEAR. All graduate students who have completed at least one full year of graduate study toward a master's or doctor's degree.

FULL-TIME STUDENTS. Those whose academic load-coursework or other required activity is at least 75% of the normal full-time load.

FULL-TIME-EQUIVALENT (FTE) ENROLLMENT OF PART-TIME STUDENTS. Convert part-time students *(lines 15-28)* into full-time equivalents by one of the following:

(1) Use a method already employed in your institution to compute FTE's for some other purpose.

(2) Sum the credit hours for part-time students and divide by the normal full-time credit-hour load. (NORMAL FULL-TIME CREDIT-HOUR LOAD) is usually determined by dividing the total number of credits required for completing the program by the number of terms normally required to obtain them. Do not confuse this with the minimum number of credit-hours required for a student to be classified full-time (75% of a normal full-time load). NOTE: Divide by the normal, or average, full-time load, not by the minimum full-time load. For most institutions, this will be 15 credit-hours (not 12).

(3) Assign a fractional value of full-time to each part-time student, appropriate to your institution, such as 1/4, 1/3, or 1/2. Remember that a student taking 3/4 *(75%)* or more of a normal full-time load should be classified as a full-time student.
